**ENGINEER** › Ken Roberts, West Winfield, NY

**BUILDERS** › Vaddi Const., Rodman, NY  
Riche Const., Watertown, NY  
Higgins Const., Clayton, NY

“As a major distributor of Arxx Building Products in the northern United States I offered some of my Certified Installers an opportunity to have some experience in building above grade by participating in this project. The experience they gained was invaluable. Everyone involved on the site was later hired to do other above grade projects.

My company has been a distributor of the Arxx Wallsystem for years. I have always sold the idea to my customers that owning an Arxx home will mean benefits such as reduced heating and

cooling costs and savings in home insurance. After living in my own new Arxx house this really hit home.

We recently had a bitter cold day with a chill factor of 53 below zero, and the wind howling. I didn't have a clue of the weather conditions from inside the house.

My office, located over the furnace, was still 80 degrees with no heat on in the room. And the rest of the house was quiet and warm.

There is one exception however. As we were building our home I realized I could add an additional room off my daughter's bedroom over our

garage and we built this using stick frame. When you walk in that area it's like walking into a different world, cold and drafty. My own home is my best sales tool.”

Jefrey Martusewicz, Seaway Wall Distributing, Inc.
